Also, the content that is added to a Plone site will have to be evaluated, especially when audio-visual materials are added. Testing with assistive technologies only done with English, Spanish and Portuguese language versions.)

Evaluation Methods Used: Testing with assistive technologies, testing is based on general product knowledge, similar to another evaluated product: Plone

PLEASE NOTE: While a VPAT® can be an essential aid in assessing the availability of ICT products with accessibility features, it is important to note that, even in cases where a product conforms to relevant standards and technical specifications, an end user may still encounter difficulties utilizing it due to the nature or severity of his or her disability. On the other hand, a product that may not fully conform to all technical requirements may still be perfectly accessible to an end user who has a disability, but does not need a particular accessibility feature, e.g., a large-button telephone handset for an individual with a hearing disability.
